BIBLIOGRAPHY OF HIGH-TEMPERATURE
KILN DRYING OF LUMBER

David P. Lowery and Dr. John P. Krier

INTERMOUNTAIN FOREST AND RANGE EXPERIMENT STATION
Forest Service
U. S. Department of Agriculture
Ogden, Utah
Joseph F. Pechanec, Director

THE AUTHORS

DAVID P. LOWERY has been engaged in forest products utilization research since 1957 when he was reassigned as a Forest Products Technologist to the Intermountain Forest and Range Experiment Station from the U.S. Forest Products Laboratory in Madison, Wisconsin. During this period, he has published several reports. His project headquarters is now in Missoula, Montana.

DR. JOHN P. KRIER is Professor of Wood Technology in the School of Forestry at the University of Montana, where he has taught since 1953 and now directs student research projects on wood drying. He has published numerous articles on this subject.

BIBLIOGRAPHY OF HIGH-TEMPERATURE KILN DRYING OF LUMBER

This bibliography of high-temperature kiln drying of lumber is generally comprehensive through 1964. Many of the articles have been published in foreign languages, and copies of the original or translations may be difficult to obtain. Such articles have been included to make the listing as complete as possible. The authors would appreciate having any omissions or errors called to their attention.

Headquarters for the Intermountain Forest and Range Experiment Station are in Ogden, Utah. Project headquarters are also at:

Boise, Idaho

Bozeman, Montana (in cooperation with Montana State University)

Logan, Utah (in cooperation with Utah State University)

Missoula, Montana (in cooperation with University of Montana)

Moscow, Idaho (in cooperation with the University of Idaho)

Provo, Utah (in cooperation with Brigham Young University)

FOREST SERVICE CREED

The Forest Service of the U.S. Department of Agriculture is dedicated to the principle of multiple use management of the Nation's Forest Resources for sustained yields of wood, water, forage, wildlife, and recreation. Through forestry research, cooperation with the States and private owners, and management of the National Forests and National Grasslands, it strives — as directed by Congress — to provide increasingly greater service to a growing Nation.
